

GSM Scout

Simply supervising with your mobile and SMS - immediately informed,
immediately reaction! Connect, adjusting, ready!

Gesellschaft für Telekommunikation

Supervising of:

- Sailing vessel, boats and yachts
- Camper and Caravans
- Homes

General information

The scout GSM is an inexpensive and easy solution for the supervision of movable objects like boats, yachts, caravans or campers as well as the supervising of homes. Over connected sensors the device grasps, e.g., burglaries, upcoming fire, water or other serious events. These are immediately sent by SMS to any mobile phone and the user is able to initiate immediately countermeasures. The system is simply configurable about the phone number memory of the SIM-card and is ready for use immediately.

Technical specific features

- The comfortable connect about screw contacts
- No special software necessary
